

SUSTAINABLE ROOFING

HIGH SCHOOL ROOF USED TO COLLECT WATER

END THE TEAR OFF CYCLE OF YOUR ROOF

Tower Energy specializes in materials and services that are designed to convert your existing roof to a sustainable system. High grade polymers encapsulate and protect your roof from the sun and weather while providing a new waterproof membrane that is renewable. These materials vary and adapt to meet the demands of the existing environment.

NSF RATED FOR RAINWATER CATCHMENT

Adurel is NSF rated to be non-toxic when collecting water. This is important when harvesting rainwater for domestic usage. Today's water shortages are only increasing, the option to collect rainwater is more important than ever. Harvesting rainwater for industrial use can also save millions of gallons of water from the treatment plants and lower load on municipalities while reducing costs. Many times the collection and treatment costs on site will be 80% lower than municipal water costs.

WARRANTED MAINTENANCE

Tower specializes in high performance maintenance ideas that restores instead of replaces your roof. Most roofs deteriorate at the flashing and seams first before the field deteriorates. Adurel will permanently replace the existing flashings to stop leaks at a fraction of the cost of replacement.

DIFFICULT AREAS ARE GREATLY SIMPLIFIED

POTENTIAL AREAS

- Harsh Industrial Environments
- Restaurants
- Single Ply Roofs
- Built Up Roofs
- Modified Bitumen
- Metal Roofs
